

BROILER FARM CEKREKCIJE, VISOKO

Project title	Chicken/broiler fattening farm in Cekrekcije
Sector	Agriculture sector
Location	Cekrekcije, Visoko Municipality
Location description	The farm is located next to the highway A-1 at Visoko suburbs approx. 200 m from main road, 1 km from city center and 20 km from Sarajevo airport
Company description	The company was founded in 2015. in cooperation with the company Brovis d.d. Visoko. The Brovis company is responsible for the supply of day old chicks, food and veterinary supervision, and we take care for fattening and delivering adult chicken to the Brovis. We have done this quite successful so far.
Project status	In progress
Project description	<p>The farm has an area of 2700 m² It is located on a property of 5267 m² and consists of two floors. The capacity of the farm is 40 000 broilers on two floors. Each floor is 60x20 m². The building is made of solid material with thermal isolation (Styrofoam 10cm). The video surveillance is provided. A 50kw transformer has been installed to supply the farm with electricity. The backup power is provided through an aggregate of adequate power. The farm has all necessary permissions. Modern computer equipment had installed by the German company "Big Dutchman". Big Dutchman is a leader in this type of work. That equipment includes radiators for heating, fans and windows for ventilation, and air condition based on water sprinklers for cooling. The buyer of a farm takes over the contracted job, because the current owner of farm has a long-term contract to sell products on the domestic markets.</p> <p>There is also an opportunity to invest in photovoltaic power plant, for which the company has already obtained all necessary permits and approval including the FERK license.</p>

	<p>Regarding the photovoltaic power plant, a feasibility study of the profitability of the investment was carried out. All necessary documentation and the work was carried out in cooperation with the Elektroprivreda BiH and Hifa Oil Tesanj. A photovoltaic power plant has been installed on the one side of the roof. It has a power of 60kw and all the necessary permits. Since the photovoltaic power plant is located on the roof on the existing building it does not require use permit. But it is needed certificate of the city administration, which the company has already obtained.</p> <p>The photovoltaic power plant has started working. It is located on the one side of the roof with the possibility to install another one on the other side of the roof. Additionally, to this investment, also the company has invested in a semi - automatic self - dosing furnace, asphalt for plateau area and access road, facility for straw and piling construction etc.</p> <p>The farm is the winner of the award for the best achieved production results in 2021 in category of 15 000-50 000 broilers.</p>	
Estimated total investment cost	770 000 EUR	
Inputs provided by local partner	Value	Description
Inputs required from foreign partner	Value	Description
	770 000 EUR for sale	
Form of cooperation with foreign partner	Financial	Technical
	Sale
