

BIOMETRIC SELF - SERVICE HOTEL RECEPTION

Project title	Biometric self-service Hotel Reception	
Sector	Innovation and Tourism	
Project background	Biometric Face Recognition Technology	
Project status	Machine and software prototype finished	
Innovation description	<p>Biometric Self-service Hotel Reception is new self-service concept designed to improve guest satisfaction and security through biometric document and face identification, check-in, check-out and many other new profitable services.</p> <p>Check/In: Biometric face recognition reduces the crowd at the Hotel reception at the arrival of the larger groups. Check/In time with room key card issuing is just 55 seconds and increases the safety of the guests.</p> <p>Check/Out: Accelerates payment at Check/Out with bills and bank cards and allows the payment in foreign currency.</p> <p>Small and medium sized hotels do not need a person at the front desk because the Biometric Self-service Hotel Reception operates 24/12.</p> <p>Biometric Self-service Hotel Reception offers many other 24/7 services in public places such are: airport check out, airport lobby, ports, bus stations, railway stations, shopping centre in the city, petrol stations, and etc.</p>	
Intellectual property, Patent	Intellectual Property Office UK Design Rights No. 5000188	
Estimated total investment cost	1.000.000 EUR	
Inputs provided by local partner	Value	Description
	300.000 EUR	Machine and software prototype finished
Inputs required from foreign partner	Value	Description
	700.000 EUR	Providing of all equipment and tools for production
Form of cooperation with foreign partner	Financial	Technical
	Joint Venture	Access to technology, equipment etc.
