

CABLE CAR TO RUJISTE, MOSTAR

Project title	The cable car to Rujište
Sector	Tourism sector
Location	City of Mostar
Location description	The starting point is planned at the Potporim site, at the foot of Rujište, and then the route goes over the Rujište plateau to the Varde plateau, further to the Čelopek mountain peak, i.e. the Obrljin arrival station.
Project background	Gondola-panoramic cable cars as a future tourist product, would serve the mountain, tourist-recreational massif Ruište.
Project status	Preliminary design is made
Project description	The estimated length of the cable car at Rujište is 5.4 kilometres with an altitude difference of 1,100 meters. The future cable car would have a capacity of 1,000 passengers per hour, who would arrive at their final destination in 15 minutes. The cable car on Ruište would connect the altitude from 500 to 1,800 altitude. A pre-feasibility study was done for the project, in which it was conceived as one development project where all its spaces would live continuously, both in summer and in winter.
Inputs provided by local partner	Pre-Feasibility Study Use of land with investors obligation to build
Form of cooperation with foreign partner	Public Private Partnership Lease
