

## FARM FOR OUTDOORS KEPT CATTLE GAZIJE , ROGATICA

<b>Project title</b>	Farm for outdoors kept cattle in Rogatica Municipality
<b>Sector</b>	Agriculture sector, meat production
<b>Location</b>	Rogatica Municipality, Gaziје village
<b>Location description</b>	Project location is territory of Gaziје village (Rogatica municipality). The village is located at 800m above sea level, 45km from Sarajevo, with a richness of pastures and structure of the land that provides excellent conditions for this kind of farming.
<b>Company description</b>	It is an Agricultural farm, family business on family homestead. The family has experience in cattle keeping.
<b>Project status</b>	Small family business of 6 cows and 1 bull of Salers breed.
<b>Project description</b>	<p>The project proposes the procurement cattle for extensive breeding of Galloway, Angus or Salers breeds - depending on which of these breeds is available, because they are the most suitable for this type of farming.</p> <p>The plan is to keep the cattle in cow-calf system that provide calf's for sale every year, which are very much wanted at the market by the meat companies - for the veal meat or for the further fattening.</p> <p>Meat is very popular because it is grown organically - by completely natural diet (only grass and hay) with no supplemental feeding and because it has a positive effect on the human body - it does not create bad fat in human organism.</p> <p>Breeds Galloway, Angus and Salers are undemanding breeds, known for good food conversion as well as for quiet and gentle character, they are long-lived, late maturing, fertile and easy calving, extremely resistant and adapt to the various conditions of keeping. Thanks to their resistance they are kept outdoors all year round, they do not use the barn. The cows are not milked, all the milk is used for calves feeding. This type of farming is relatively new in our area and proved to be very profitable because of the modest needs and good health of these breeds. Because of the minimum costs, this type of farming is becoming more and more popular.</p>

	<p>The project proposer is interested in for joint venture, partnership in a way that local partner gets part of earnings (from cattle that would be sold every year – once a year) to foreign partner until pay off his investment. Annual earnings per cow are 500 EUR.</p> <p>The farm has capacity to eventually expand to additional 30 cows.</p>	
<b>Estimated total investment cost</b>	<p>Necessary investments for farm for outdoors kept cattle are App. 46 500 EUR for procurement of 30 cows .</p> <p>In B&amp;H the cattle can be purchased at a cost of approximately 1 500 EUR per cow, depending on age, fertility, esc.</p> <p>In case of purchasing as much cattle as planed it is also necessary to by a tractor with its attachments to prepare hay for the winter.</p>	
<b>Inputs provided by local partner</b>	<b>Value</b>	<b>Description</b>
		<p>The private area from 50ha to 100ha of pasture, and in addition to private there is unused state land - unlimited space, which can also be used as pasture for cattle.
