

GOATS FARM „CAPRA ANIMI“ PRNJAVOR

Project title	Goats farm “Capra Animi”, Prnjavor	
Sector	Agriculture	
Location	Prnjavor Municipality	
Location description	The farm is located near Prnjavor city and local roads connect it with Banjaluka, Gradiska, Derventa, Nova Topola and Srbac (these are the nearest municipalities important for the product placement, since none of them is more than 55 km away).	
Company description	The farm is founded in 2014 and deals with goat farming for the production of goat milk with three workers employed currently.	
Project status	This project is currently in the stage of buying alpine goats for milk production. The next activity should be the construction of cheese dairy and a modern installation for milk production and placing the goats.	
Project description	The ultimate aim of this project is the production of goat milk, cheese, whey, yoghurt and other dairy products. Goat farming is one of the deficient production activities in Bosnia and Herzegovina; therefore different possibilities are available for the production and placement of these products on the market. The advantage of this production is the possibility of exporting the products abroad. This sector also provides a chance for young people to be employed in rural areas, simultaneously enabling their survival in villages, which would prevent depopulation in these areas.	
Estimated total investment cost	180 000 EUR	
Inputs provided by local partner	Value	Description
	54 000 EUR	Buying goats, Purchasing milking equipment
Inputs required from foreign partner	Value	Description
	126 000 EUR	Buying the manufacturing plant, Building the facility
Form of cooperation with foreign partner	Financial	Technical
	Joint venture	Marketing expertise, Technical expertise Access to technology, equipment, markets, etc.
