AGRICULTURE AND FOOD SECTOR

Competitive advantages

- ▶ Agricultural land consists of 35.282 ha, or 71.52% (high fertility land, located mostly along the shore of the Sava River;
- ▶ High potential for directing primary agricultural production to processing capacities, especially in industrial crops of sunflower, soy, rape seed;
- ▶ Available raw material base;
- ▶ Qualified and well-trained staff, and the possibility of scientific-research and technical cooperation with Universities;
- ▶ Opportunity for production of inovative products;
- ▶ Developed export market.

Sector Chart

Over 190 companies in the sector employs more than 690 people, accounting for 7% of total employees, or 26% of the number of employees in the manufacturing industry.

The share of the food sector in Brčko's total exports is 61%, and in total revenue 1,49% (gross value of production). Exports account for 0.25% of total sector revenue (export / BVP).

Employment in the sector is growing at an average of 3,61% on the annual level for the observed period from 2014 - 2018.

The most significant investments and companies in the sector

- „STUDEN AGRANA“ d.d. a sugar refinery plant with a capacity of about 180.000 tons of sugar per year;
- “Bimal” d.d. a production plant for edible oil and protein sprouts, a capacity of 120.000 tons of current seed processing, 60.000 tons of refined oil.
- “Bosnaplod” d.o.o. production and processing of fruits (jams, juices, dried fruit, 100% plum paste, frozen fruit pasta of different varieties, deep frozen fruit) on a daily basis produces 15 t of jams, 68.000 l of juices, 80 t of deep frozen finished products, 12 t deep frozen pasta and 12 t dried fruit. “Bosnaplod” has its own plantations of fruit on 140 hectares.
- The most important companies involved in the processing of cereals can be mentioned: “Klas” doo, “Voćar” doo. “Biljana” d.d., “Elektromlin Stokic” doo, “Mlin Vujičići” doo.
- “Voćar” doo, makes processing of significant quantities of potatoes and produces flips and chips in different variations.
- „Briž” doo, production of pudding, rolls and creams;
- The Food Industry segment in the Brčko District of BiH is also processing medicinal herbs and coffee processing “Mingos-Coffee” d.o.o.

Agriculture and Animal Husbandry

The moderate continental climate is suitable for agriculture and animal husbandry. In the Brčko District of BiH 34,000 hectares of land are under corn, wheat, rapeseed, soy and other crops. The land is suitable for growing many types of fruit. Animal production, such as cattle, pigs and poultry fattening, is well developed and it enables growth of the meat processing industry.

Story of Success

Based in Brčko, Bosnia and Herzegovina, the core business activities of the oil factory BIMAL are the processing of oilseeds and grains, the production of raw and refined edible vegetable oil, protein meals, lecithin and fatty acids. BIMAL processes all three types of oilseeds - sunflower, soybean and rapeseed. BIMAL started its business development in 2002 when the Austrian company Seed Oil Holdings GmbH, based in Vienna, took over the edible oil production plant BIMAL d.d. in Brčko and continued the expansion of business activities, which led to the establishment and takeover of six more companies in the business system. The construction of the Agro-industrial complex in Brčko and the establishment of the BIMAL Group began in 2009 with the acquisition of the company ŽITOPROMET Brčko. With the expansion of operations in Serbia in 2013, the Group chose Belgrade as the location of its main trading company, BIMAL Trading. In 2015, the company BIMAL Agri was founded in Bečej with the aim of storing oilseeds and grains, and in 2017, in order to further develop the business, the company BIMAL Invest was founded with headquarters in Belgrade. On its own initiative, in 2016 BIMAL established the Institute for Development and Improvement of Agriculture IRUP Brčko as an added value in BIMAL's efforts to utilize the agricultural potential of Bosnia and Herzegovina and create a domestic raw material base, thereby engaging local producers and farmers and increasing employment. BIMAL is one of the rare business groups that initiated a large investment from Bosnia and Herzegovina, from Brčko, in Serbia. In 2019, BIMAL took over a factory with a tradition of producing edible oil in Sombor, today's BIMAL SUNCE factory. In addition to the raw materials and components for animal feed that have been produced in BIMAL Group's factories before, with the acquisition of the animal feed factory BEČEJKA in 2021, the business group also started the production of complete and supplementary mixtures for feeding domestic animals.
