

Meeting FIPA - City of Široki Brijeg

6/8/2023 2:09:24 AM

All of the above has already been recognized by numerous foreign investors, who have been successfully operating in the area of the City for a number of years, where there is a tradition of working in the processing industry (metal industry, processing of plastics), construction and service activities (wholesale and retail trade is the most represented).

Business investment opportunities with special emphasis on the processing sector and export-oriented companies, investment in the development of the so-called of creative services in the ICT sector, and investment in production and industrial plants.

The city of Široki Brijeg has the possibility of investing in numerous renewable energy sources, and is one of the most favorable locations in Europe for investing in renewable sources from the sun.

During the meeting, the existing industrial zones, the existing foreign investors operating in this area, and the activities that the City carries out in order to attract and retain investors were discussed.
